Rural Settlement and Land Use

Types of Rural Settlement Garden Guides

July 20th, 2017 - Farms are rural settlements on large plots of land which use the land itself to grow crops. These settlements usually have a farm house for barn and livestock equipment and a few other structures on them like a well or water tower. Many farms are self-sufficient able to pump their own water eat their own harvests and milk their own cows.

December 26th, 2019 - Land use is simply the human use of land and its use in the urban area is generally conform to a predictable pattern the decision to develop a piece of land for a particular use may be made independently by various private businesses or the primary reason for allocating a specific use is the rapid urbanization.

December 28th, 2019 - Urban land use is intensive. There is keen land use competition. The land rent is the highest urban settlement has a large population size and a high population density. Urban dwellers have a higher living standard. Secondary and tertiary activities are dominant.

A GIVEN COUNTRY RURAL SETTLEMENTS include populated areas whose inhabitants are engaged primarily in agriculture. Settlements may include small permanent villages with well defined boundaries of land use. A rural settlement may include areas used for agricultural purposes, for grazing of animals, for the production of forest products, and for mining and mineral extraction. Urban settlements are characterized by a high population density and a high degree of land use specialization. Industrial and commercial activities are dominant.

In rural settlements the most basic sitting factors can be seen clearly at work. This is because permanent villages like the semi-permanent settlements of shifting cultivators or nomads or the temporary camps of hunters and gatherers from which they evolved have the same basic requirements of food water shelter and protection.

The effects of rural settlement evolution on the countryside and the rural settlement study. The rural settlement and land use studies are very useful for harnessing the full potential of the rural dwellers. They provide a practical tool for keeping pace with the rapid structural changes in rural areas. They facilitate the planning and management of rural settlements and land use.
